BATHS AND THERMAL JOURNEY

THERMAL JOURNEY:
Hammam, Hay Sauna, Steam Room

BATHS:
Tepidarium, Caldarium, Frigidariums,
Scottish Buckets

Nestled between Elms and towering Redwoods in the Oxfordshire woodland, this first-of-its-kind sanctuary is conceived as a labyrinth of intimate and social spaces. The soul of the bathhouse is its colossal tepidarium, offering space for congregation and relaxation. Beyond there, you will find a series of thermal pools designed for hot and cold contrast therapy, a hammam, steam room, and sauna.

Ancient rituals, informed by the world's oldest philosophies of health and longevity take place behind the doors of the treatment rooms, offering bespoke healing for the skin, psyche, and soul.

In this time that celebrates busyness above all else, Eynsham Baths is a subversion. We believe it is well within our body's right to request a short pause in the usual pace of life.

The baths await you.

THE BATHS

Not far from here, the remains of centuries-old ROMAN VILLA ruins lie partially discovered. From this same soil we built the foundation of EYNSHAM, which is conceived with respect for the HEALING PRACTICES of the PAST. We have taken the most efficacious TIMEWORN TECHNIQUES and combined them with MODERN THINKING to create an experience that combines past and present, East and West, RESTORATION and RENEWAL.

TEPIDARIUM: *36 degrees celsius*

This social bath occupies the heart of our space, and is where your journey begins. Maintained at a restful temperature, fatigue will begin to dissipate.

FRIGIDARIUM: *15 degrees celsius*

This cold pool provides an instant boost of neurochemicals to sharpen the mind, reducing cortisol, brain fog, and chronic fatigue. Gain resilience and marvel at how your body naturally adapts to the elements.

FRIGIDARIUM X: *10 degrees celsius*

Initiate radical healing with this ultimate biohack. Plunge into the freezing waters to instantly reset and recover all systems. Used by athletes to repair damaged tissues, expect rapid pain relief and muscle regeneration. Boost your immune system and metabolism. This is an exercise in mind over matter.

CALDARIUM: *40 degrees celsius*

The hottest bath of all, our Caldarium is a sunken bath which targets neuro-relaxation and reduction of adrenal stressors. Regenerative heat increases the blood flow, improving circulation throughout the body.

SCOTTISH BUCKET: *8 degrees celsius*

A rapid route to stimulating all systems. With the pull of a chain, an invigorating deluge of icy water drenches the body from head to toe. Feel alert from the endorphin boost that immediately improves your mind-body connection, stimulating happiness and creativity.

HAY SAUNA: *70-100 degrees celsius*

Sourced from our adjacent farm, allow the aroma of warm English Hay to induce relaxation. Proven to have a significant and lasting effect on stress, our sauna releases endorphins, improves the metabolism, and boosts your circulation and immune system. The results arrive in minutes but last for hours.

BOTANICAL STEAM ROOM: *42-48 degrees celsius*

Dense with atmospheric fog and natural botanicals, steam infuses warmth into the body, providing physical and mental relaxation, while soothing the nervous system. Breathe deeper and more effectively, while speeding up toxin removal.

BREATHWORK POOL: *12-17 degrees celsius*

This outdoor marble pool draws your eyes toward the sky, which provides a magnificent distraction from the pool’s frigid temperature. From guided group plunges to solo breathwork sessions, this is a transformative experience under nature’s roof.

HAMMAM

Drawing inspiration from the thermal springs of North Africa and the revered marble chambers of the Middle East, our Hammam has three traditional marble kurna basins and an imposing central table. A deeply purifying ritual, the hammam aids in detoxification, resulting in a radiant and velvety feel across the body.

CONTRAST THERAPY

LEAD YOUR OWN *experience, or follow our MORNING or EVENING circuits for a MULTI-LAYERED, thermodynamic RITUAL that works for your schedule. We have drawn upon the clinical research from Dr. Huberman and Dr. Søberg on THERMODYNAMICS and the proven benefits of cold water and CONTRAST THERAPY.*

Our breathwork master, EMMA ESTRELA, who is currently the only Level 3 Wim Hof instructor in the UK, has crafted a protocol for STIMULATION and one for RELAXATION.

OUR
ETHOS

At Eynsham Baths, we have taken the principles of the 5 Koshas from ancient Indian wisdom and applied them to the philosophy of our treatments, products, and our music.

Koshas can be translated to mean sheaths or layers. By acknowledging these Koshas, we are able to interact with the mind and body at a far deeper level. These 5 Koshas are as follows:

1. ANNAMAYA KOSHA
(PHYSICAL SHEATH)

This Kosha relates to your physical-material body. It is the sheath by which we sense, feel, and move. It is best looked after by the food we consume, daily movement, and body rituals.

2. PRANAMAYA KOSHA
(VITAL ENERGY SHEATH)

Prana in Sanskrit means ‘breath’ and is one’s life force. Awareness of one’s breath allows us to breathe more consciously and deeply therefore forcing stagnant energy to shift and fuelling the body with vitality.

3. MANOMAYA KOSHA
(MENTAL SHEATH)

This layer constitutes our thoughts. When the mind becomes still, we give our emotions the space they need to process correctly. It is where we seek clarity.

4. VIJNANAMAYA KOSHA
(WISDOM SHEATH)

This Kosha is the home to our inner wisdom and knowledge. It is this aspect of being which knows life intimately and from where can tap deeply into our intuition, free from all outward influences.

5. ANANDAMAYA KOSHA
(BLISS SHEATH)

This is the most subtle and innermost of the five Koshas. It is the sweetness of all life when we experience sheer bliss and unity. It is this essence that embodies ultimate peace.

*A NOTE
ON OUR
PRODUCTS*

Products—good ones—are an exercise in patience. Ours were many years in the making. They are a form of natural medicine, informed by the wisdom of plants, which should never be underestimated.

We use only the finest oils, derived from the finest growers and suppliers. They are hand-blended and coaxed to life while mantras play.

We don’t blend on a full moon. Nor do we blend in a bad mood (it would be a lie to say we didn’t encounter them).

Our intention is to create complex, efficacious formulations.

And now, it is a pleasure to offer them to you as a small prayer of health.

ABOUT NAD+

The molecule nicotinamide adenine dinucleotide, otherwise known as NAD+, is a crucial coenzyme which can be found in every cell in your body.

As we age, our cells can no longer produce the energy of youth. An essential co-factor required for cellular energy transfer is NAD+, which plays a critical role in regulating the rate at which we biologically age. NAD+ is used by every cell in the body and works in two distinct ways to mitigate ageing. First, it increases mitochondrial activity and secondly, it activates specific Sirtuins shown to regulate life span.

As a result of the exhaustive amount of research being carried out, NAD+ has emerged as the best-known longevity and human performance supplement on the market today, and is more commonly known as the miracle molecule.

SUMAN JALAF

Award-winning Suman Jalaf is the leading authority in custom brows. Suman has been professionally tending to brows for over 20 years, having cut her teeth with eyebrow threading before leaning into her innate skill. She first developed her signature brow technique in 2013 with Microblading and later, much more cutting-edge techniques such as Nanoblading and Diamant (diamond-tip) blading, to achieve for the most precise and natural finish.

STEP 1: MICROBLADING

120 MINUTES / GBP 700

Microblading is a remarkable technique that transforms once rebellious brows into polished, preened, perfect arches, that frame and lift the face. Microblading – or eyebrow embroidery as Suman calls it – is fast becoming the go-to beauty treatment thanks to the minimal downtime and low maintenance finish. The Microblading method adopted by Suman is a hybrid of learnings so it’s truly unique. First the ‘brow architecture’ is measured and analysed with a Brow Ruler to ensure the perfect size width, depth and shape is achieved, Suman also considers face shape, features, hair type and growth patterns.

The treated area is numbed using a light cream, before Suman begins the process. Using delicate strokes, the hand held micro needles manually implant feather light strokes with a medical grade approved pigmented colour into the epidermis layer of the skin. There is no downtime with the treatment, but a follow up appointment is required 12-18 weeks after to simply top up and ensure the desired look has been created.

STEP 2: TOUCH UP

90 MINUTES / GBP 350

Suman will see the clients after 5 months as she will make a trip again.

Top up is required after 12-18 weeks after the initial treatment is done to ensure the desired look has been created once the ink and skin has settled.

STEP 3: ANNUAL TOUCH UP

GBP 560

This is done after the touch up and is required after 10-12 months.

BESPOKE BROW METHOD (SHAPE AND TINT)

45 MINUTES / GBP 80

Beautiful eyebrows mean beautiful arches. First, you and your therapist discuss your preferences and how you want your brows shaped. Your brows are then mapped out so that we only remove the excess hair. You will be left with stunning, fluffy brows.

SHAPING

25-30 MINUTES / GBP 55

Using thread to shape and map the brows to perfection.

BROW LAMINATION

45 MINUTES / GBP 110

A ‘lash lift’ for your brows designed to open up your eyes and give you a fuller, bushier brow without microblading or semi-permanent makeup. This process uses a chemical solution to adjust your eyebrow hairs by straightening them to stay in place and can last for up to 2 months. It’s great for taming thick, unruly brows and encourages the hair to grow in the same direction.

Wake up every morning to perfect brows and flawless arches with this non-invasive treatment. It’s vegan and cruelty-free. Don’t get your brows wet or apply makeup, cream or oil to them for at least 24 hours after your treatment.

LASH LIFT

45 MINUTES / GBP 150

First, your lash therapist places cotton pads over your lower eyelids and curved silicon pads are placed over your upper eyelid. A bonding solution is then brushed over the eyelashes, pushing them against the curved silicon pad. Next, your therapist checks for clumping and ensures that each of your lashes is equally spaced. Following this, a perming solution is applied and left to process for around ten minutes. After that, the solution is removed, and a neutralizer solution is applied and left to process. Finally, your therapist removes your lashes from the silicon pad using a moist cotton swab and cleans your eyelids.

The lash lift is the ideal treatment to make your lashes flutter and shine. Please note: A patch test may be required 24-48 hours prior to treatment.
